

Warning – Potential Danger

These products are treated with wood preservatives registered with the United States Environmental Protection Agency and the California Department of Pesticide Regulation and should only be used in compliance with the product labels.

This wood may contain chemicals classified by the State of California as hazardous and should be handled and disposed of with care. Check product label for specific preservative information and Proposition 65 warnings concerning presence of chemicals known to the State of California to cause cancer or birth defects.

Anyone working with treated wood, and anyone removing old treated wood, needs to take precautions to minimize exposure to themselves, children, pets, or wildlife, including:

- Avoid contact with skin. Wear gloves and long sleeved shirts when working with treated wood. Wash exposed areas thoroughly with mild soap and water after working with treated wood.
- Wear a dust mask when machining any wood to reduce the inhalation of wood dusts. Avoid frequent or prolonged inhalation of sawdust from treated wood. Machining operations should be performed outdoors whenever possible to avoid indoor accumulations of airborne sawdust.
- Wear appropriate eye protection to reduce the potential for eye injury from wood particles and flying debris during machining.
- If preservative or sawdust accumulates on clothes, launder before reuse. Wash work clothes separately from other household clothing.
- Promptly clean up and remove all sawdust and scraps and dispose of appropriately.
- Do not use treated wood under circumstances where the preservative may become a component of food or animal feed.
- Only use treated wood that's visibly clean and free from surface residue for patios, decks, or walkways.
- Do not use treated wood where it may come in direct or indirect contact with public drinking water, except for uses involving incidental contact such as docks and bridges.
- Do not use treated wood for mulch.
- Do not burn treated wood. Treated wood should not be burned in open fires, stoves or fireplaces.
